WHO WE ARE...

AT SOUL LEVEL...

In Egypt, there is a monastery built in honor of St. Catherine. She was known for her courage.

To be true to herself and to her soul in the face of being threatened with torture and death. She was a very powerful influence in the third century BC and part of the reason she was even feared by the leadership of the day was because of her powerful commitment to HER TRUTH. Her Cathedral is the perfect place to visit to anchor in our soul stories.

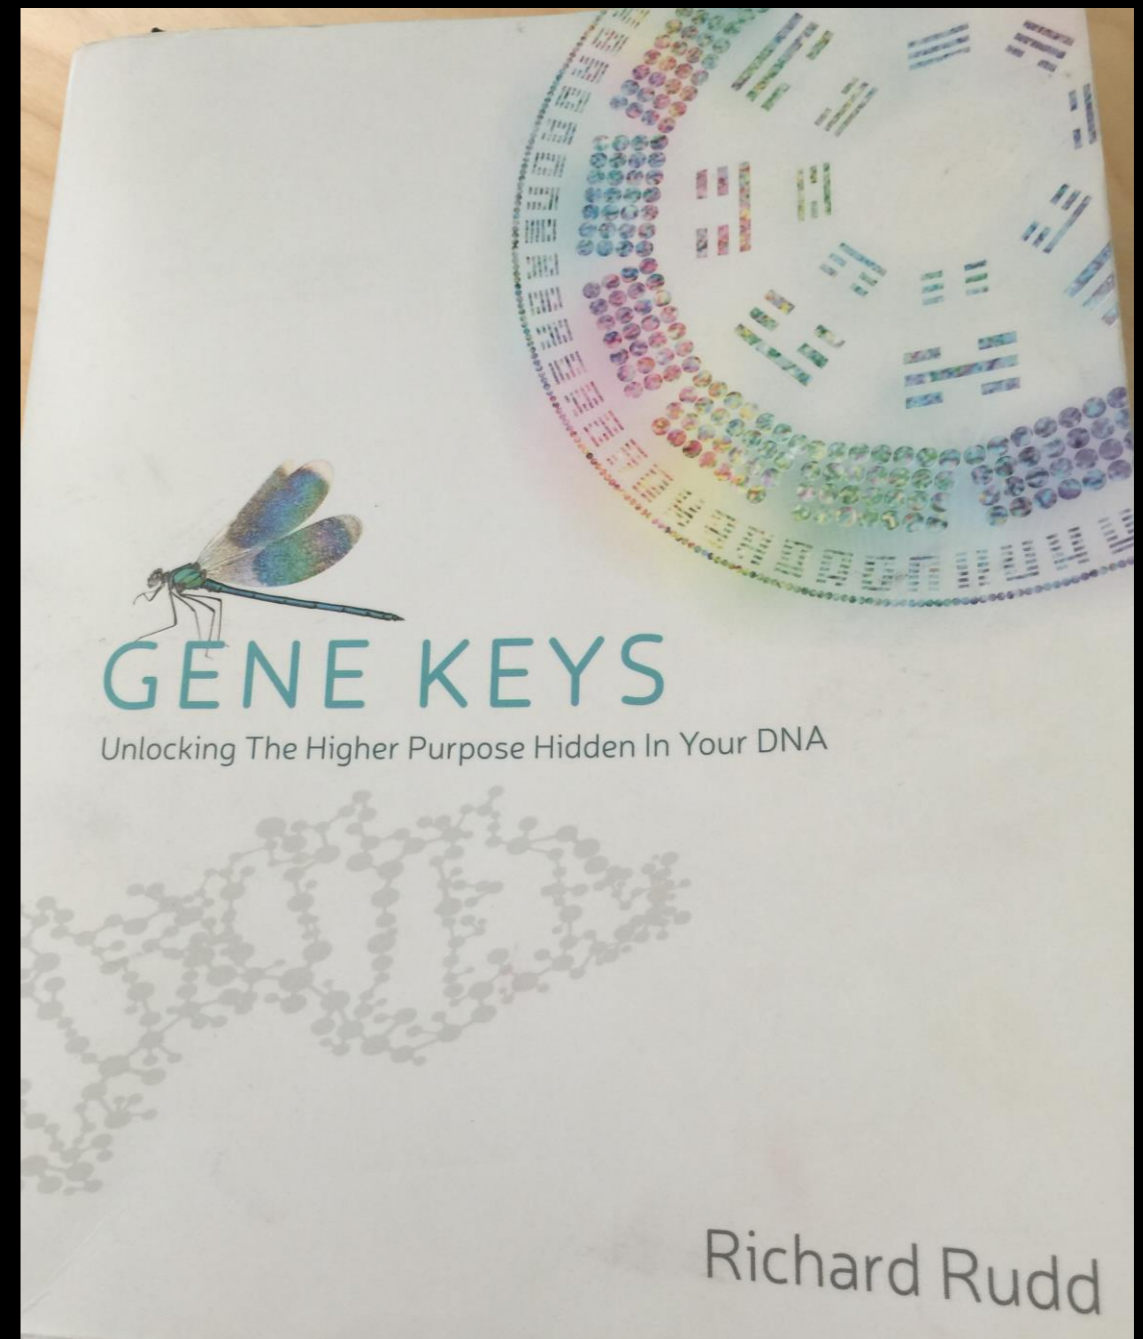

# St. Catherine's Cathedral

MAJESTY is not really a state of being—it is the truth of all nature in motion. It is the Divine energy that constantly moves through the human form. It is through the 34<sup>th</sup> Siddhi that we get the idea of man as God. At this level the Divine Essence of creation can only move freely through the body when the identity has ceased to exist. If this Sidi dawns in a person, they do not communicate through words or language but through their actions and movements. It requires an individual to transcend their genetic fear of survival by bringing their presence fully into every moment. Once you have entered the Siddhic frequency, all fear is purged from your system and the pure awareness of your body's physical intelligence is revealed.
